

Lucky array ?

Input file: **standard input**
Output file: **standard output**
Time limit: 1 second
Memory limit: 256 megabytes

Given an array A of N integers. Your task is to check if it's **lucky or not**.

an array is called lucky if the count of odd numbers is even or the count of even numbers is odd.

Input

The first line of input contains one integer N ($1 \leq N \leq 10^5$) the number of elements in the array. The second line of input contains N integers $A_1, A_2, \dots, A_N$ ($1 \leq A_i \leq 10^5$) the array elements.

Output

Output two lines:

in the first line print the count of evens then the count of odds then **"Lucky"or "Not Lucky"**.

in the second line print the array as it is.

Examples

standard input	standard output
5 2 2 2 1 1	3 2 Lucky 2 2 2 1 1
6 2 4 1 7 9 12	3 3 Lucky 2 4 1 7 9 12
