Given a 2×2 matrix:

$$\begin{bmatrix} a & b \\ c & d \end{bmatrix}$$

Your task is to compute its determinant: $(a*d - c * b)$.

Input

First line contains a, b ($1 \leq a, b \leq 100$).
The second line contains c, d ($1 \leq c, d \leq 100$).

Output

print the value of the matrix determinant.

Example

standard input	standard output
2 3 4 1	-10
