Output file: `standard output`
Time limit: 1 second
Memory limit: 256 megabytes

Given an integer x , find the multiple of 10 that is closest to x .
If there are two such multiples, print the larger one.

Input

The only input line contains an integer x ($11 \leq x \leq 10^9$).

Output

Print the multiple of 10 that is closest to x .

Example

standard input	standard output
12	10
